[Web CV](#)

I am a Web Developer with enthusiasm and focus on frontend development. I am passionate about building modern applications, creating effective solutions, and learning every day to grow professionally in the IT field.

SKILLS: React, Redux, JavaScript, CSS3, HTML5, Git/Github, MySQL, Node.js, Python, SAP

WEB PROJECTS

Clothing - E-commerce project with use of React, Redux, Firebase, Stripe API.

Integrated Stripe payments gateway and Google sign-in APIs for faster payment process and sign-in/sign-out without registering new account.

Face Recognition - This application allows you to identify the detection of faces in any image supplied. This was achieved thanks to Clarifai's artificial intelligence API. I used React, JavaScript, CSS5, Tachyons in order to create it. Node.js and PostgreSQL are used for Backend.

Robofriends - It is a React web application that uses the Robohash API for generate robot profiles and JSON Placeholder API for fetching users. It is styled with Tachyons NPM package which represents sort of "NPM Bootstrap". Search function filters robot names based on inserted characters in input field.

Rainbow Tours - It is a project web site for a tourist agency from Croatia.

Casino Form - It is a simple project in React for Registration.

Startup Landing Page - It is a simple project for Event Registration with use of Bootstrap4.
